Tools & Platforms: Power Apps (introductory), Power BI (dashboard familiarity), Power Automate (introductory), Visual Studio / VS Code, Git, GitHub, GitLab

---

## PROFESSIONAL EXPERIENCE

Digital Editor & Sales Associate | Artina's Jewellery, Victoria, BC

May 2022 - Present

- Polished product images using Photoshop, increasing visual appeal and online engagement
- Managed website updates and product listings via Shopify, ensuring accuracy and efficiency
- Gained hands-on experience with Shopify's Liquid templating language by introducing custom features such as a gift wrap checkbox at checkout and an input field for ring sizes, which improved user experience and order customization

---

## PROJECTS

[DanLand Interactive Map Game](#) | **Web Project (React, Tailwind CSS, Vite, Vercel, APIs)** Apr 2025 - Present

- Collaborated with a teammate to develop an interactive map-based web game using React and Tailwind CSS where players select a Pokémon avatar and navigate between predefined points
- Implemented API to dynamically retrieve and render Pokémon character data, enhancing gameplay realism
- Crafted a responsive interface with smooth avatar movement, clean UI structure, and optimized mobile performance
- Employed Git and Github for branching, merging, and live updates while collaborating on feature development with a teammate
- Deployed the project on Vercel for continuous hosting and seamless integration with the Github repository

[Client Landing Page](#) | **Freelance Web Project (React, Tailwind CSS, Vite, Vercel, UI/UX)** Apr 2025 - Present

- Built core sections of a responsive landing page using React and Tailwind CSS to help a client communicate services effectively through clean, branded design
- Applied reusable React components and utility-first styling with Tailwind CSS for maintainability and design consistency
- Translated client feedback into iterative layout and UI/UX improvements during the development process
- Concentrated on accessibility, performance optimization, and mobile-first responsiveness across all sections
- Adopted Git for version control and project tracking in preparation for final deployment upon completion

[Web Portfolio](#) | **Personal Website Project (React, Tailwind CSS, Vite, Vercel, UI/UX)** Jan 2025 - Mar 2025

- Developed a fully responsive personal portfolio using React and Tailwind CSS to showcase projects, work experience and contact information
- Created reusable components and smooth scroll navigation for a seamless user experience
- Focused on clean UI/UX design, accessibility standards, and mobile-first responsiveness
- Added interactive features such as animated project cards, contact form with validation, and hover effects
- Hosted the website using Vercel for fast, reliable and continuous deployment from GitHub

**VikeEats | Web Development Project (React, Tailwind CSS, Figma, UI/UX)**

Jan 2025 – Apr 2025

- Contributed to the frontend of a campus food web application using React and Tailwind CSS to improve student awareness of dietary accommodations available at each cafeteria
- Designed a responsive "Contact Us" page with a clean layout, accessibility features, and full mobile compatibility using Tailwind CSS
- Used Git and GitHub for version control in a collaborative development environment

- Collaborated with a team in an Agile environment, improving communication and version control practices

---

**VOLUNTEER EXPERIENCE**

Secretary | Ukrainian Club, University of Victoria Sep 2023 - Present

- Coordinated monthly events and fundraising efforts to support displaced Ukrainians in Canada
- Kept track of detailed meeting minutes to ensure transparency and keep members aligned on goals and tasks
